

**AMENDMENTS TO THE SPECIFICATION**

(1) On page 16 of the specification, after the paragraph beginning "XX," please insert the following new paragraph:

Fig. 16 is a sectional view of a portion of a mounting structure of one or more embodiments.

(2) On page 19 of the specification, please replace the paragraph beginning "Next, a movement" with the following amended paragraph:

Next, a movement at the time when the protruded member is press-fitted in the recessed member will be described. An inner diameter of the mounting hole 91 (D1 of the invention), an outer diameter of the head 21 (D2 of the invention), an outer diameter of the external circumferential surface small diameter section 34 (D3 of the invention), and an inner diameter of the press-fit passage 33 before press-fitting the protruded member 2 (D4 of the invention) are set to  $\phi$  15mm (tolerance:  $\pm$  0.1mm),  $\phi$  8mm (tolerance:  $\pm$  0.3mm),  $\phi$  15.5mm (tolerance:  $\pm$  0.4mm), and  $\phi$  7mm (tolerance:  $\pm$  0.5 mm), respectively. D2 and D3 are illustrated, for example, in Fig. 16, a sectional view of the recessed member 3 of the mounting structure of the embodiment illustrated in Fig. 2.
